

Our operators watch your cameras **at night**

We connect to your cameras. Our operators watch them at night. When they see a threat, they act.

Your existing cameras

No new wiring

Up to 11 PM to 6 AM

The hours you choose

Trained operators

Real people check

365 days a year

Every night of the year

HOW IT WORKS

The 3 steps

1

Connect and set up

We connect to your CCTV. You do not need new cameras or wiring. We also fit alarms where you want them. Our operators can set them off.

2

We watch your property

Our operators watch your cameras live at night, up to 11 PM to 6 AM. A person can tell a thief from a dog, a shadow or rain.

3

Instant response

When our operators see a threat, they act at once. They call you, set off the alarm at your property, and call the local police if needed.

WHEN THEY SEE A THREAT

What our operators do

Check

The operator makes sure it is a real threat.

Siren

A loud siren at your property tells the intruder they have been seen.

Warn

If the camera has a speaker, the operator talks to them.

Call you

We call you straight away and send you a clip.

WHY PEOPLE WATCH

Alerts on your phone are not enough

Camera apps send alerts for dogs, shadows and rain. At 3 AM your phone is on silent. Our operators check every alert and act on it. You can sleep.

- ✓ Every alert checked by a person
- ✓ Fewer false alarms
- ✓ Action taken, not just a message sent

Tell us about your property.

We will call you about your property and cameras. Then we send a quote.
