

All your cameras, on **one** screen

See the cameras at all your sites in one place, in your web browser. It works with the cameras you already have.

One login

For all your sites

Works with your cameras

Nothing to replace

Find footage fast

In minutes, not hours

Runs in your browser

Nothing to install

THE THINGS YOUR TEAM DOES EVERY DAY

What you can do with it

Watch live

Group your cameras by floor, building or shift. Save the views you use every day.

Camera tour

One screen shows your cameras one after another, on its own. No one needs to click.

Play back recordings

Go back to any time of the day. Preview the footage quickly before you watch it in full.

Search one area

Mark a door, an aisle or a loading bay. See only what moved there, without watching hours of video.

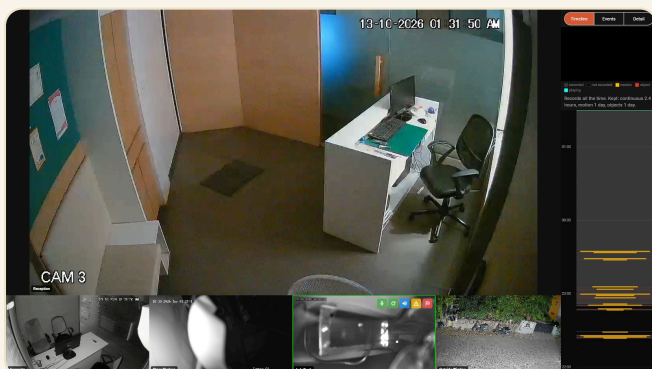

Talk through a camera

If a camera has a speaker, you can talk through it. For example, to a delivery driver at the gate.

Manage it yourself

Add a camera, name it and put it in a group. You do not need to wait for us.

One camera, live, in the browser.

WATCH LIVE

The way your team works

- ✓ Groups by floor, building or shift
- ✓ Saved views, one click away
- ✓ Any camera full screen with one key
- ✓ Hover over a picture to see the camera's name

See it on your own cameras.

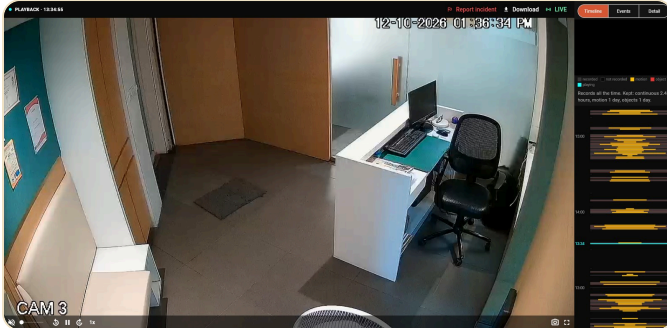

We show you Modernnext VMS live. It is free and there is no commitment.

PLAY BACK RECORDINGS

Go back and see what happened

Pick a camera that is being recorded, and a time. The recording plays where you were watching live, and one click takes you back to live.

A recording playing, with the timeline beside the picture.

The speed menu: 1x, 2x, 4x and 8x.

- ✓ Go back 10 seconds or forward 10 seconds
- ✓ Play at 1x, 2x, 4x or 8x
- ✓ See other cameras at the same moment
- ✓ Download the part that matters

FIND IT, AND KNOW WHAT WORKS

Less time looking

Mark an area

Draw a box around a door, an aisle or a loading bay. The VMS finds the moments something changed there.

See which cameras work

One screen shows a recent picture from every camera and how old it is. A camera that is down is marked in red.

Every event in one list

Alerts, detections and motion, for the cameras and the time you choose. Open any card and the recording plays from that moment.

TWO SITES OR FIFTY

It works the same way

One login for all your sites. Move between them without signing out, or see them together on one screen. Each person sees only the sites they look after.

WITH OUR MONITORING

Day is yours, night is ours

Use Modernext VMS for the day. Add our monitoring and trained operators watch the same cameras at night, up to 11 PM to 6 AM.

See it on your own cameras.

We show you Modernext VMS live. It is free and there is no commitment.
